

## Beautifully Natural

---

Revivive™ is our line of body care products that are loaded with all-natural and certified organic ingredients that provide health benefits from head to toe!

Revivive products do more than clean the skin—they are free from chemicals that introduce toxins into the body.

## Awareness is Key

---

Some of the chemicals found in typical body care products are considered environmental hazards by the EPA—yet it's perfectly legal for manufacturers to put them in their products, indirectly allowing you to put them in your body. How many of these chemicals have you been using daily without realizing the damage they can cause?

## A Fresh Approach

---

Because the skin is both a barrier and a carrier, we created Revivive to bring you a healthy cleaning alternative for your largest organ, the epidermis.

### White Tea Extract

Revivive features a base of certified organic Camellia sinensis leaf extract, commonly known as white tea, which has natural conditioning properties.

### Sweet Blue Lupine Peptides

Offer an effective way to maintain skin health and enhanced wrinkle reduction.

### Coconut-Derived Decyl Glucoside

A natural, non-ionic surfactant that does not dry out hair or skin.

### Wash Away the Pollution

Your scalp is one of the most absorbent parts of your body—which is why it's so important to keep your hair care toxic free. Typical shampoos and conditioners contain harsh chemicals that don't just clean your hair—they destroy it. Most commonly, bargain shampoos strip your hair's natural moisture with harsh sodium lauryl sulfate, then attempt to condition it synthetically with silicones and other chemicals.

[Reviive Shampoo's](#) nurturing formula is free from harsh chemicals, detergents, phthalates, carcinogens, synthetic fragrances, and colors that do more harm than good. Organic, natural ingredients help heal the destruction from the environment and styling while protecting you from introducing unwanted elements into your body through the skin.

### [Reviive Conditioner](#)

#### Smooth as (Shea) Butter

Luxury at home is the best kind of luxury there is. [Reviive Conditioner](#) features a luxurious blend of certified organic tealeaf extract, aloe leaf juice, and other ingredients to give you touchable soft hair.

[Reviive Conditioner](#) features a unique blend of certified organic Shea butter and phytic acid to hydrate and smooth your hair, giving it a naturally soft feel. Well-known for its moisturizing properties, Shea butter also adds luster and shine to hair, restores elasticity and protects against sun damage. Phytic acid, derived from rice, helps remove accumulated toxins and supports healthy pH balance, resulting in soft, shiny, tangle-free hair.

### [Reviive Body Wash](#)

Gentle. Fresh. Clean.

Keep your skin radiant and cleaner than ever with [Reviive Body Wash](#). Our luscious formula is hypoallergenic and made with certified organic ingredients whenever possible. And since it's toxic-free, you're not introducing anything unwanted to your skin—keeping you clean in every way.

Sweet blue lupine extract is part of our secret of success. This unique ingredient provides water-soluble protein and beneficial peptides that have been linked to a myriad of benefits, such as improving elasticity and protecting skin from damaging UV rays.

## Toothpaste

---

### Naturally Simple

Reviive Toothpaste relies on naturally-mild abrasives such as calcium carbonate and hydrated silica to keep your teeth sparkling. Our toothpaste is free from sodium lauryl sulfate and fluoride to help keep you free from toxins.

Flavored with certified organic peppermint essential oil and vanilla.

# We've been led to believe a host of myths about our personal care products

---

- \_Big suds get big results
- \_You need to strip your hair of moisture for a true clean
- \_Perfumed fragrance is what counts most
- \_White toothpaste means white teeth
- \_You need fluoride for dental health

Why myself and my family would never use anything but the Revive range now

This product is rated a 10 for carcinogenicity, developmental & reproductive toxicity, and allergies & immunotoxicities. Literally bathing babies in cancer and killing their fertility.

UNFORTUNATELY, although Johnson & Johnson takes the heat (kind of like McDonalds in fast food), most baby products are JUST AS BAD. Even the ones with "babyganic" type names. It's just a name. It doesn't mean it's any less toxic. Just like Burger King isn't any less terrible for you than McDonalds...

Parents. Our little ones don't get to choose. They don't have a voice. This is our job. This is the BASIC FUNCTION of being a mama or daddy (or grammy). Protecting them.

In the age of information with everything at our fingertips, ignorance and inaction are a CHOICE. Let's not make that choice for our kiddos! Throw this crap in the TRASH and find a company you trust -- not because of their marketing or their name or because there's leaves on the packaging, but because you READ THE LABEL and you know every ingredient in it to be GOOD.

For us, the only company that meets those standards is Young Living. And it's a one-stop shop... straight to our doorstep.

By using alternative cleansers and organic ingredients, Reviive protects you from introducing toxins into your body.

### White Tea Extract

Reviive Shampoo, Conditioner, and Body Wash feature a base of certified organic *Camellia sinensis* leaf extract, commonly known as white tea, which has natural conditioning properties.

### Sweet Blue Lupin Peptides

Offer an effective way to maintain skin health and enhanced wrinkle reduction.

### Coconut-Derived Decyl Glucoside

A natural, non-ionic surfactant that does not dry out hair or skin.

Chantelle Bradds personal experience using the [Reviive](#) body wash - [Reviive](#) shampoo & conditioner and Jouve collection

🌟🌟🌟🌟TESTIMONIAL🌟🌟🌟🌟

So I've suffered with eczema all my life, and Christmas day I suffered an allergic reaction which flared my skin severely. I went to the hospital twice and the doctors twice and was prescribed the usual steroids and emollients - which some contain paraffin and sulfates and I hate using them. However the irritation was incredible and I used it as directed, unfortunately the roughness and redness/pinkness has remained months on. 😞

Body wash and hair products are a huge contributing factor for me as whenever I was using them I'd become irritated by the products and my skin would become red and I've tried many products! 😞

I decided to start using jouve brightener mid February and have used the [Reviive](#) range twice and the difference is incredible already. My eyes are still soar from whatever allergen is bothering me still but as you can see but my skin is clear, for the first time in aaaages! When I shower my skin isn't left feeling irritable or itchy anymore which is mad! I don't remember the last time that happened. If you suffer from eczema or know someone who does i recommend trying these products!

[Reviive](#) Shampoo, conditioner and bodywash.

Jouve brightener and dark circle corrector.

They've changed my life. 😊😊😊

Thank you for reading!
